Why you need Mobile Guardian at School

Safe, secure and managed IT

At Mobile Guardian we understand that the growing number of electronic devices you need to manage brings with it a growing number of challenges, including an increased amount of IT budget and support.

That's why we have developed a device agnostic Mobile Device Management (MDM) platform to deliver an unsurpassed, secure learning environment that simplifies digital classroom management, saving teachers time and enhancing student learning.

We deliver a platform that facilitates parent inclusion, to both share knowledge and ensure that device management and learning are not confined to the classroom.

Our cloud-based technology has been developed specifically for education. That's why we have not just one, but three interactive dashboards — allowing the IT team, Teachers and Parents to access the information they require without being overwhelmed by irrelevant data.

Mobile Guardian supports:

iOS   Chromebook   Android   macOS

Why Mobile Guardian for Schools

For the education establishment, Mobile Guardian delivers a myriad of benefits and features for multiple stakeholders.

Our mobile device management (MDM) platform gives Teachers, IT administrators and Parents total oversight of all the tablets and smartphones their students and children use.

With the intuitive, dashboard-driven interface it is both quick and easy to determine how devices are being used and where they are, whilst simplifying application control and providing a safe online environment.

Mobile Guardian allows schools to extend the reach of mobile technology into the home, creating a boundless and safe learning environment for their students and delivering full visibility and inclusion to parents.

Safeguard students, empower teachers and offer parental inclusion

With Mobile Guardian, schools can manage, track, secure and protect all education related devices, whether on school property or off-campus. They will also safeguard students and deliver an engaging digital curriculum.

Support IT with shared administration

For the IT department, Mobile Guardian delivers an intuitive platform to create multiple policies per device and shared administration access across numerous departments. So whilst supporting Teachers and Educators, our technology also frees up IT support time by sharing control.

OUR INNOVATIVE SYSTEM ENABLES YOU TO:

- Share control and simplify device management for IT departments

- Centralise management, diagnostics and monitoring across mobile devices

- Bolster your e-safety strategy and support OFSTED compliance with included web filtering

- Enable pre-configuration and application distribution

- Deliver time-saving, lesson planning tools for teachers

- Create a balance between policies and restrictions to create responsible digital students

MOBILE GUARDIAN:

- Provides sophisticated geofence & location services to locate students and their devices at any time

- Significantly reduces lost devices and simplifies inventory management

- Delivers granular reports on online activity and device use

- Places digital classroom control in the hands of teachers

- Reduces cyber bullying with robust security policies

- Supports parents and creates transparency across all stakeholders
