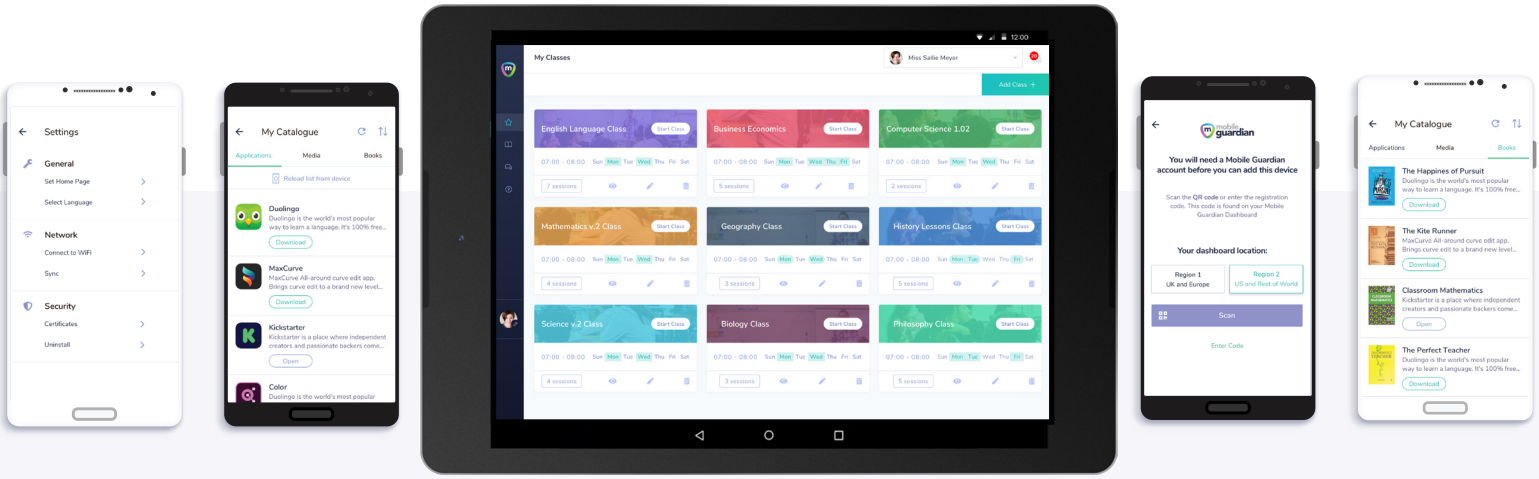
Mobile Guardian for Android

Manage Android devices in the classroom and out! Purpose-built for education, Mobile Guardian is a cloud-based, easy-to-use solution that keeps students safe, whenever they are learning or playing online. With MDM controls, classroom tools, web-filtering and linked parental controls.

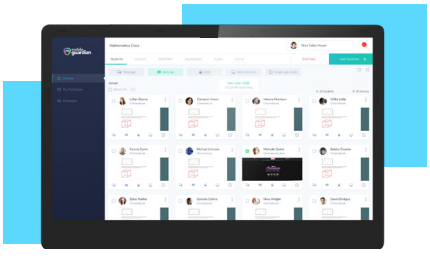


Mobile Guardian supports

iOS · android · chromebook · macOS

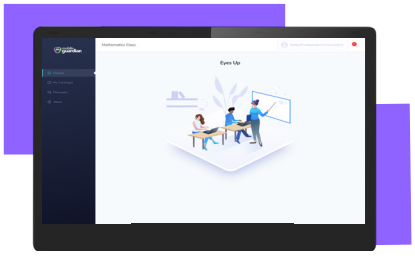
A Class Act

A set of easy-to-use classroom tools that offer teachers an extra pair of eyes in the classroom. Take a look at our popular in-class features for Android devices below.



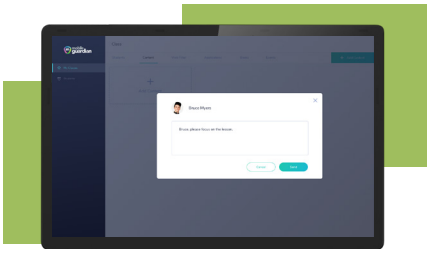
Live Screen Views

Oversee, in real-time, which sites students are browsing during class. This is a quick way to see what each student is busy working on and great for virtual classrooms.



Eyes Up

Get your class's attention at the touch of a button. Eyes Up displays a block screen on each device and requests that the student look up at their teacher.



Messaging

Send messages to your students. Use this feature to help students with a specific task or problem, or send them feedback on their assignments.

Effortless App Management

Block and Filter Apps

Limit app access by black/whitelisting apps. Have peace of mind that devices only access what they're supposed to.

Silent App Installation

Make bulk app installation easier, Mobile Guardian enables you to install apps without any user action.

Remotely Uninstall Apps

Remove apps from the device without ever needing to handle it. Manage app uninstallations from your desktop.

Features That Simplify Android Management

Enable Kiosk Mode (COSU)

This means added security and fewer distractions. Kiosk mode locks down the device and confines the user to a single app.

Safe Web Browser

Filter and restrict web access using keywords and URLs. Curate exactly which sites the device can access, in line with your ePolicy.

Restrict Functionality

Configure the device to meet the exact needs of your user. Disable the camera, Bluetooth capability or Wi-Fi hotspot.

Location Tracking

Know exactly where your devices are at all times. Configure alerts to trigger, should the device enter or exit a specific area like a school or the office.

Location-based Settings

Set up your policies to switch based on the device's location. Different rules will apply when the device is at school, or at home.

Screen Share

Using the dashboard, teachers can share their screen with the entire class. Teachers can also select a student's screen to share.

Inventory Management

Keep a close eye on the health of your fleet. Quickly identify devices that are deployed, awaiting updates or archived.

Wipe Devices

Save time by remotely wiping mobile devices. Great for setting up devices at the beginning of the year.

Remotely Push Content

Send content like Youtube links, PDFs and web clips to several devices at the touch of a button.

"Mobile Guardian has exceeded our expectations! We now have geo-tracking and real time, web activity monitoring capability allowing us to keep students on task. I highly recommend this to any educational institution that is considering using this product."
