

More possibilities in just a few taps

With just a few taps and swipes, the iPad can transform the way you teach and how students interact with learning materials. From interactive apps to screen sharing, iPads open a whole world of possibilities for teachers and students.

With children becoming increasingly familiar with technology it makes sense to introduce it into the classroom and utilize the things they already love to create better learning opportunities. So what are you waiting for?

Read our tips on how to get the most from iPads and how Mobile Guardian can help you ensure that student and devices are safe and secure.

Books brought to life

iBooks gives schools access to children's books, classic novels, biographies, reference guides and textbooks from major education publishers. Many of these resources are free and because they've been adapted for iPad use they've been created to be an immersive and interactive reading experience from students.

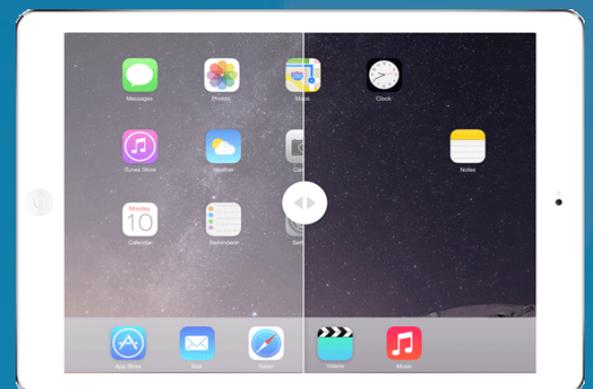

Can't find the perfect book for your lesson plan? iBook Author app for Mac lets you create your own multi-touch learning materials.

Once you've found the iBooks you need to support your lessons, Mobile Guardian Book Manager allows you to share these across devices in minutes.

Interactive teaching with apps

The Apple App Store has over 75,000 educational apps providing teachers with access to interactive learning materials for all subjects and levels. You'll find apps to help you teach phonics to young learners, right through to interactive apps that let you and your class soar through planets. And lot's of education apps are free, take a look at [Teach Thought's top 55 free apple apps for teaching](#).

Allowing students access to iPads raises concerns about students being distracted, but [Mobile Guardian's Mobile Device Management](#) (MDM) software let's you share and block apps on devices to ensure students are focused.

Let students take control

Got a TV in your classroom? Hook up your student's iPad and let them lead the way. Technology has completely changed the dynamics of the classroom and the ways that teachers and students can interact. Letting students lead may be daunting but it may also help you to understand how different students learn using iPads.

Get started with [Mobile Guardian MDM](#) which allows mirroring and sharing screens quickly and easily.

Personalised learning, one size doesn't fit all

Every student is different, so it makes sense that personalised learning is becoming more common in the classroom to support individual needs. With endless online resources, iPads make it easier for students to access materials that support their learning styles.

Mobile Guardian can facilitate personalised learning by using student profiles to share different content and apps relevant to their learning path. Plus, our one-to-one messaging helps teachers provide instant feedback and support.

In the classroom and beyond

Light and compact, iPads are perfect to facilitate learning outside of the classroom by allowing students to access learning materials easily wherever they are. So there's no longer the excuse of not having an textbook to hand.

Of course, allowing devices to leave the school has it's risks; from misuse of devices to loss or theft. Mobile Guardian has numerous [features](#) to ensure students and devices are kept safe including geofencing technology, cloud-based web filtering and inventory management to help you track and manage devices wherever they go.
