The Challenge

What problem did you have?

We had an existing MDM vendor in place, but were unhappy with the level of support we were receiving from them. We were looking for a new MDM provider who offered the not only the MDM features that we needed, but improved levels of customer support as well.

Why Mobile Guardian?

Mobile Guardian's support is a lot better and the initial setup was quick and without hiccups. We went from their web demonstration, straight to trial and then made the purchase once the testing period was done.

What did you need from an MDM solution?

We needed an MDM solution that would enable us to manage an entire suite of iPads on one platform, allow for content management for our modern language courses and track devices. Most importantly, we were looking for better levels of customer support.

The Result

Did we solve it?

Yes, Mobile Guardian also offered great customer support when compared with our previous MDM.

What do you like about Mobile Guardian?

Once installed, one of the immediate benefits was the simplification of managing devices within our school. Secondly, the support provided by Mobile Guardian was significantly better than our previous MDM provider.

Testimonials

> " *Mobile Guardian's support is a lot better than our previous MDM vendor. They had terrible support and so we made the switch over to Mobile Guardian.* "

> " *The Mobile Guardian setup process was very quick and without hiccups..* "
