

Mobile Guardian for Chromebooks

Give agency back to your teachers and manage Chromebooks in and out the classroom with the most powerful mobile device management (MDM) platform in education.

Take a look at top features and classroom management tools below.

Mobile Guardian supports

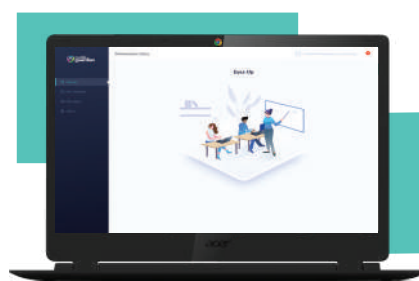

A Classroom full of Chromebooks

Our Classroom Management tools help teachers keep tabs on each student and minimise online distractions in class.

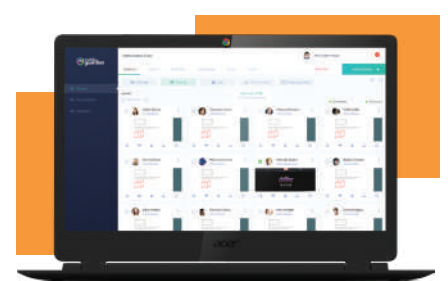

Activity Timeline

Using the timeline you can ensure all students are on the same page. Scroll back through the class to see how the class spent their time.

Eyes Up

At the touch of a button, teachers can quickly get their students' attention. Eyes Up displays a block screen on each device and requests that the students look up at their teacher.

Live Views & Tab Control

View and dismiss distracting tabs on Chromebooks, directly from the teacher dashboard in real-time. You can also refocus students on the task at hand.

Features That Simplify Chromebook Management

Shared Device & Student Linking

Operating a shared device strategy? Mobile Guardian facilitates this, as well as seamless student linking.

Student Browser History

Access browser history records for each device. Understand and monitor how they are being used and pinpoint areas of concern.

Time & Location Restrictions

Switch device state based on either time or location. Different policies apply whether the device is at home, at school, or in a maths or arts class.

Metering for Chromebooks

Understand how and where time is being spent on devices. Use the data to help in decision making at a class and school level.

Application Blocking

Block distractions and cut down on time-wasting by specifying exactly which apps each Chromebook can access.

Location tracking

Curb device theft by creating alerts that trigger when the device exits a specific area. Know where your Chromebooks are at all times.

Safe Web Filtering

Control web access on your Chromebooks through keyword and URL filtering. Ensure that each device operates according to your unique ePolicy.

Student Messaging

Send bulk or individual messages. Communicate to the class about an upcoming school trip, or send feedback to a student.

Screen Share

Using the dashboard, teachers can share their screen with the entire class. Teachers can also select a student's screen to share.

It's a simple, step-by-step process

Setup Your Dashboard

Enroll Chromebooks

Push Apps

Manage Everything Remotely

Countless Chromebooks? Make managing them a breeze.
