

Designed for schools. Loved by parents.

Distance Learning, Mobile Devices and Mobile Guardian

With Mobile Guardian schools can secure and monitor school devices that now need to go home.

Classroom Management tools enable teachers to remotely view and manage student screens, push learning content, engage with students and keep them focused and on task.

Create an engaged, secure and focused academic environment at students' homes.

Visit mobileguardian.com for more

*Currently available free of charge to schools subject to enforced closure. This offer is subject to change at our discretion.

TESTIMONIAL

“Mobile Guardian **works seamlessly** throughout our organisation which includes both **Chromebooks and iPads**. The control and rollout of apps to our iPads is **easy to manage** and the screen monitoring feature for our students with Chromebooks is a **useful and necessary** tool to have in an educational environment. The **location feature** has been a lifesaver when tracking down a missing device. **Support is always helpful** and explain things in a way that isn't too techie but understandable.”

- J. Cripps, Deputy Principal, Cannons Creek
