

# Mobile Guardian for Business

A powerful, cloud-based solution for remotely monitoring and managing employee devices. Whether working from the office, from home or in the field, secure mobile devices to minimise risk and increase productivity.

Device management that's easy, quick and cost-effective.

## Supports

### Secure Devices, Wherever They Are

Our web-filter is network agnostic. Enforce policy compliance whether devices are connecting to the Internet via WiFi or mobile data.

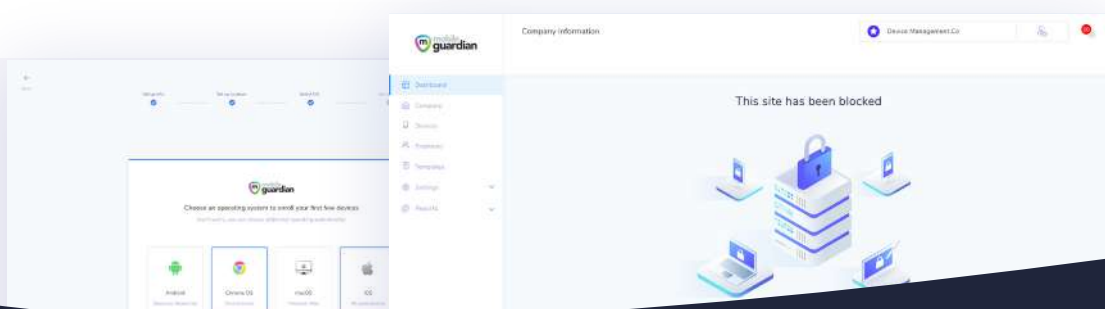

### Enjoy Central Oversight

Remotely manage and monitor mobile devices from a central dashboard. Ensure software is up to date and that devices are always work-ready.

### Remotely Manage Apps

Make sure employees have access to the software they need. Deploy, remove and block applications and manage software licenses remotely.
