Easy-to-use classroom management for modern schools

Purpose-built for education, Learn by Mobile Guardian is a cloud-based, easy-to-use classroom management solution that helps schools engage students online. Elevate your learning environments with our award-winning classroom management tools, and cloud-based mobile device management.
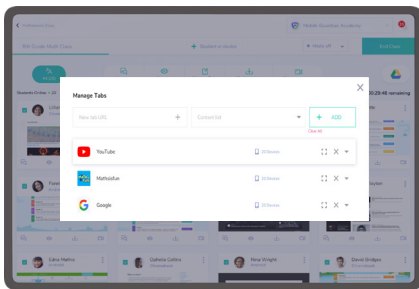

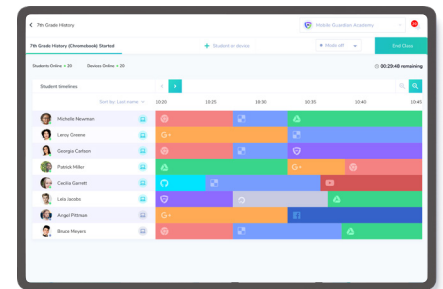

Instant Actions

Easily dismiss distractions, distribute content, message students, and share your screen with your class.
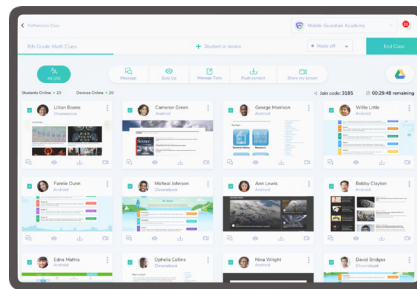

Live Screen Views

Gain a clear view of student device screens in real-time from your classroom dashboard.

Activity Timeline

Access a visual timeline of what content and applications students access in class, during or after class.

**Official mobile device management vendor for Singapore's schools**
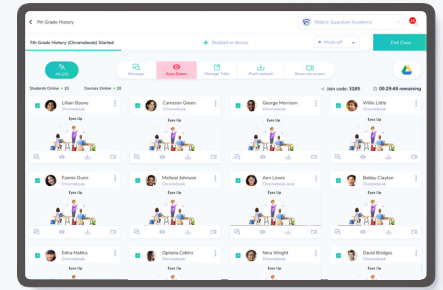

Ministry of Education
SINGAPORE
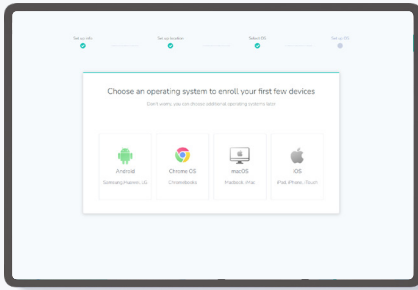

Multi-OS Environments

Combine multi-OS device learning environments to unify and guide students all from a single dashboard.

Application Management

Manage applications on student devices before or during class. Revoke access to distracting apps and ensure students have all they need to excel in class.

Eyes Up

Quick, easily and instantly lock student screens for focused instruction with a single click of a button with Eyes Up.

Award-winning features

Cloud-Based

Whether in-class, remote or hybrid - Mobile Guardian's cloud based solutions ensure that online learning is always focused and on-task.

Flexible Profiles

Define device behaviour from a single dashboard and implement restrictions across multiple schools according to your schools device usage policies.

Location Tracking

Know where devices are at all times, easily track down missing devices, and locate stolen devices.

Seamless Integration

Whether integrating Google Work-space or Apple School Manager, setup with Mobile Guardian is a seamless and fluid experience.

Time & Location Based Policies

Set device usage policies and rules that adapt depending on time and the location of devices. Easily implement different device states whether the device is at home or at school.

Push Content Remotely

Share class content to the class with ease via our in-class tools. Send links, PDFs and web clips to multiple devices at the touch of a button.

"We reached out to Mobile Guardian and booked an online demo with them. The team was incredibly helpful. Understanding the urgency and time pressure, they set us up with an account very quickly!"
