## A comprehensive and dynamic web filter for K-12 schools

Purpose-built for education, Safer by Mobile Guardian is a cloud-based, easy-to-use web filtering solution that helps schools protect students online. Elevate your learning environments with our award-winning and comprehensive web filter, cloud-based mobile device management.

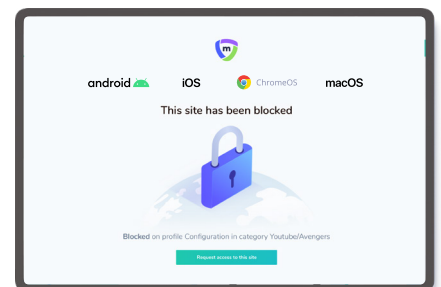

### YouTube Filter

Get the best out of YouTube with our YouTube web filter. Filter content by URL, keywords, channels and categories for an educational YouTube experience.

### Time & Location Based Filter

Trigger restrictions unique to the time of day and the location of the device to ensure they are used for the right purpose at the right time.

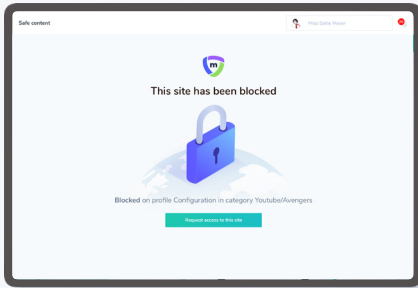

### Multi-OS Web Filter

Protect the entire mix of learning devices with a cloud-based web filtering solution that is able to safeguard multiple operating systems.

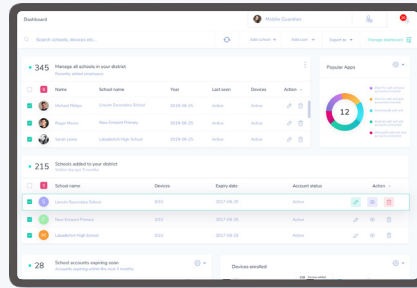

"We use Mobile Guardian's comprehensive Web-Filter to ensure that all our students and devices are protected from harmful and inappropriate online content, and that students honor our school's ePolicy."

**Jacques. J.**  
Lead Science and Technology Teacher

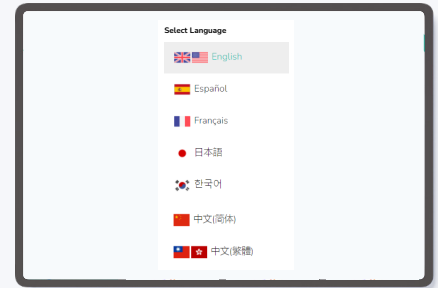

### Comprehensive Web Filter

Filter online content with ease, whether by URL, or Keyword based or from a specific topic category.

### Customisable Dashboard

Customise your dashboard to gain insight into crucial device insights at a glance; from most used apps, device locations, to time spent on devices.

### Filter Multi-byte Characters

Filter multi-byte character content for safe and focused learning environments in multiple-languages.

## Award-winning features

### Web Filter Notifications

Receive notifications in your dashboard or via email for any blocked online content or applications from your school's Blocked list.

### Web Filter Reports

Get detailed reports of what content is viewed online and gain an understanding of how students are conducting themselves online.

### Teachers Access Requests

Teachers may grant students access to content that may be accidentally blocked that is crucial to a lesson plan.

### Application Management

Manage applications within class, and grant teachers the means to block or allow applications that are accessible during class.

### Geofencing

Determine the online accessibility of your devices based on the devices location, particular wifi-network, and many other factors.

### Time & Location Based Profiles

Set device usage policies and rules that adapt depending on time and the location of devices. Easily implement different device states whether devices are at home or at school.

“We were looking for a system that would allow us to easily implement a web filter for the devices going home with students, we have now deployed Mobile Guardian across the entire district.”

**D. Coppa,**  
Instructional Technology Coordinator
