Device Management for National Device Programs

Manage devices at scale and ensure that all devices in a national device program are managed by proven device management applications.

Central, Regional & School Level Management
Manage device usages and set restrictions at various levels throughout your device program.

User Permission Assignment
Set user permissions for Administrators, Teachers and Parents to ensure devices are managed effectively.

Deployment of Centralised Policy
Policies may be set at a national, regional or individual school level, allowing for device management according to the size and scale of the device program.

Hierarchical Profile Locks
Set device restrictions according to the device program's hierarchy according to predetermined levels of control.

School Hours Implementation
Set school hours for all devices according to day lessons. After school hours, devices will automatically change to a suitable profile.

Vacation Mode
Activate Vacation mode to disable all restrictions on devices, at a national, regional, or individual school scale.

In Class Messaging
Teachers may message students during class to help keep students focused and on-task.

Emergency and Distress Alerts
Message students and staff with emergency and distress alerts to immediately inform of irregularities.
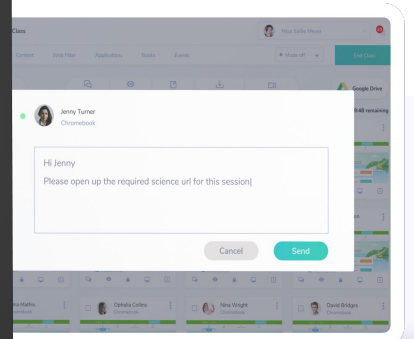

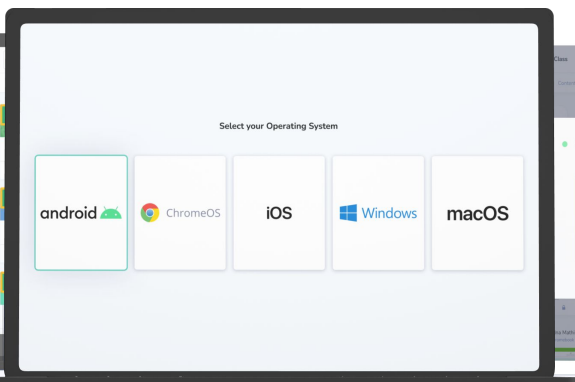

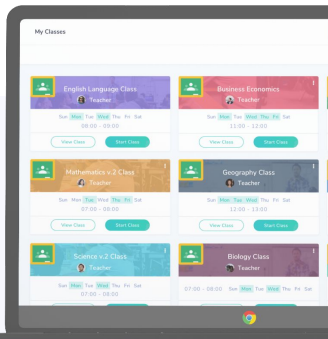

Mobile Guardian Supports

android   ChromeOS   iOS   Windows   macOS

Google for Education Partner

Web Filtering for Nationwide Restrictions

Mobile Guardian's Profiles provide an intelligent and comprehensive method of restricting devices according to device usage policies and standards.
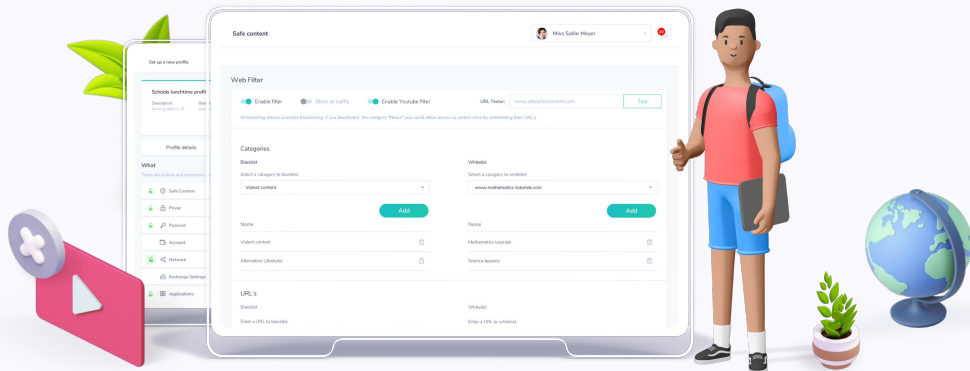

Home URL Configuration
Set a standard homepage on all devices. As students start class, devices will automatically open a predetermined URL.

Redirect URL Configuration
Should students attempt to access blocked content, a redirect URL will point students to suitable content.

Web Content Filtering

Web Content Category Filtering
Filter web content by category, for simple and far-reaching restrictions of online content for students.

Web Content URL Filtering
Block specific URLs to ensure that students remain off known distractions or inappropriate content.

Block Lists
Block online content with ease by uploading lists of restricted content to ensure students remain focused.

Allow Lists
Easily upload and utilise lists of URLs that are appropriate for students for easy Web Filtering management.

Keyword Web Filtering

Multilingual Keyword Filtering
Mobile Guardian's Web Filter functions across multiple languages, and uses a multi-byte (64 byte characters) language filter.

Local Dialect Filtering
Mobile Guardian's Filters local regional dialects for comprehensive filtering that keeps students on-task and focused in lessons.

YouTube Filtering

YouTube Category Filtering
Billions of scanned and categorised URLs that are constantly updated, blanket blocking content is easy.

YouTube Channel Filtering
Filter YouTube by channels, for easy restriction of undesired YouTube channels.

YouTube Video Filtering
Specify YouTube video URLs to restrict specific videos from lessons.
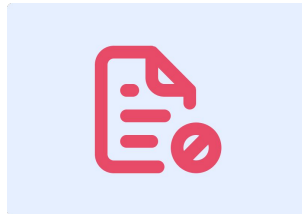

Intelligent Restriction Conflict
Mobile Guardian's YouTube web filter identifies conflict in web filter settings for easy troubleshooting.

Web Filtering Made Easy

Wildcard Domains Filtering
Filter Wildcard domains for simpler Web Filtering practices.

Blocked Web Content Permission Requests
Should content required for a lesson be blocked, students may request access during class.

Web Filter Report
Understand student online behaviour with comprehensive Web Filter Reports.

Classroom Management Tools

Mobile Guardian's Classroom Management Tools were designed for Education based on feedback and input from teachers from around the world.

Historical Event logging
Historical event logging by users of Mobile Guardian for clear understanding of device management practices.

Activity Timeline Tracking
Understand how students spend their time during class with a clear graphical view of device behaviour online.

Direct Student Messaging
Directly message a student or the class during a lesson, or to request a device is returned for maintenance.

Trigger Eyes Up/Down
Teachers can activate an instant lock screen during class to gain student attention for instruction or assistance.

Classroom Management Tools

Elevate learning with classroom management tools and create safe digital learning environments for K-12 students.

Live Screen Views
Live screen views grants teachers a clear view of students' screens during class (OS dependant).

Student Share Screen
Teachers may share a students' screen with the class to showcase a model example and engagement.

Teacher Share Screen
Teachers may easily share their screen with a specific student or the entire class for clear instruction.

Device Browser Tab Control
Teachers may directly intervene and correct students by closing active tabs on their devices in real-time.

Landing Page URL Configuration
Set a Landing Page prior to the start of a class according to class needs.

Content Distribution
Easily distribute class content to students during class, such as Web URLs, Media, and Online documents.

Google Drive Integration
Integrate Google Drive and Mobile Guardian for ease of access to Google files in class.
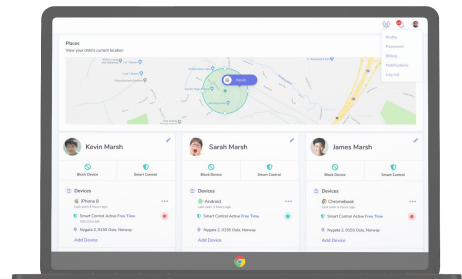

Force Class Join
Force student devices to join class upon launching a class. (Variation per OS).

Modes (Restricted Access)
Created completely restricted online learning and test environments for Exams, Quizzes and lessons.

Multi-OS Integrations

Fully integrate with Apple School Manager, Google for Education and Microsoft Intune for easy set up of at-scale device management programs.

android · ChromeOS · iOS · Windows · macOS

Cross Platform Integrations

Mobile Guardian offers software that integrates across an array of device operating systems. Allow for the complete utilisation of mobile device functionality mixed in K-12 learning environments, regardless of operating system.

Google for Education

Reap all the benefits of Google for Education in combination with Mobile Guardian.

Chrome Education Upgrade

Elevate your learning environment with a Chrome Education Upgrade for effective student and user management.

Android Enterprise

Experience the reliability and safety benefits of Android Enterprise functionality with Mobile Guardian.

Android EMM

Efficiently coordinate a large volume devices in the school across applicable regions and schools.

Apple School Manager

Integrate Apple School Manager and Mobile Guardian for easy device management.

Apple DEP Integration

Manage users, devices, and enable zero touch enrolment our Mobile Guardian and Apple DEP integration.

Microsoft Intune

Effectively manage your students, users and devices through integrating Intune and Mobile Guardian.

Windows Active Directory

Integrate Mobile Guardian and Active Directory for identity management and authentication with surety.

android   ChromeOS   iOS   Windows   macOS

"Mobile Guardian works seamlessly throughout our organisation. The control and rollout of apps is easy to manage. Support is always helpful and they explain things in a way that isn't too techie but understandable."

James C
Deputy Principal
