

Mobile Guardian for Chromebooks

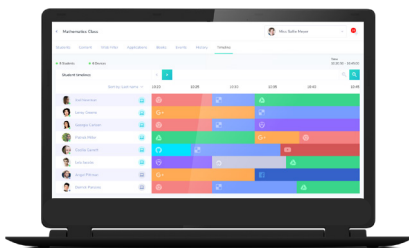

Give agency back to your teachers and manage Chromebooks in and out the classroom with the most powerful mobile device management (MDM) platform in education. Take a look at top features and classroom management tools below.

Mobile Guardian supports

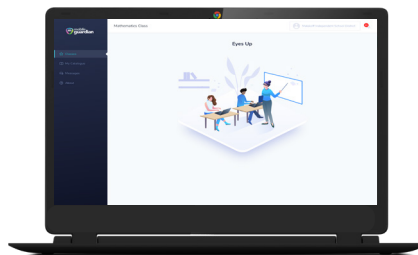

Award winning features

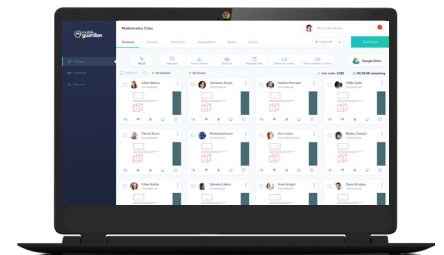

Activity Timeline

Using the timeline, teachers can scroll back through the class to ensure all students were on the same page.

Eyes Up

At the touch of a button, quickly get your class' attention with the Eyes Up block screen that requests their attention.

Live Views & Tab Control

View student screens and dismiss distracting tabs instantly from your dashboard, ensuring students remain focused.

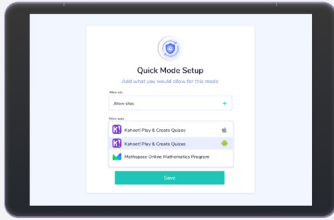

Official software vendor for Singapore's schools

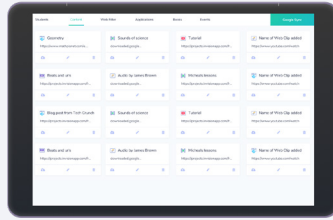

Ministry of Education
SINGAPORE

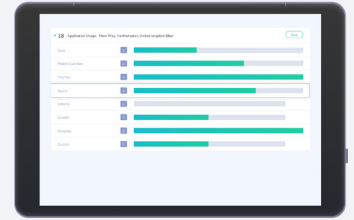

Modes

Perfect for focused learning environments, set exactly which apps and URL's students may access.

Google Drive Integration

Integrate Google Drive & Mobile Guardian, for quick and easy sharing of Google drive documents with students.

App Usage Reports

Get a detailed report of time spent on apps, and gain clear insight into which applications students use the most.

Easy-to-Use Chrome OS Features

Shared Device & Student Linking

Operating a shared device strategy? Mobile Guardian facilitates this, as well as seamless student linking.

Student Browser History

Access browser history records for each device. Understand and monitor how they are being used and pinpoint areas of concern.

Time & Location Restrictions

Switch device state based on either time or location. Different policies apply whether the device is at home, at school, or in a maths or arts class.

Metering for Chromebooks

Understand how and where time is being spent on devices. Use the data to help in decision making at a class and school level.

Application Blocking

Block distractions and cut down on time-wasting by specifying exactly which apps each Chromebook can access.

Location tracking

Curb device theft by creating alerts that trigger when the device exits a specific area. Know where your Chromebooks are at all times.

Safe Web Filtering

Control web access on your Chromebooks through keyword and URL filtering. Ensure that each device operates according to your unique ePolicy.

Student Messaging

Send bulk or individual messages. Communicate to the class about an upcoming school trip, or send feedback to a student.

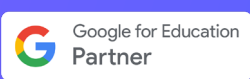

Screen Share

Using the dashboard, teachers can share their screen with the entire class. Teachers can also select a student's screen to share.

Unite all stakeholders in a students educational journey with Mobile Guardian
