MOBILEGUARDIAN
### DESIGNED FOR SCHOOLS. LOVED BY PARENTS.
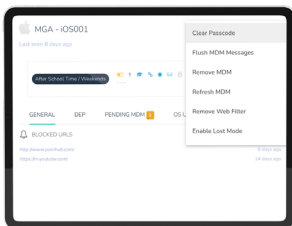

Mobile Guardian for iOS devices

Manage iPads and iPhones with the mobile device management (MDM) platform that's purpose-built for education. Our cloud-based, multi-OS solution makes it easy to manage iOS devices in your school or district.

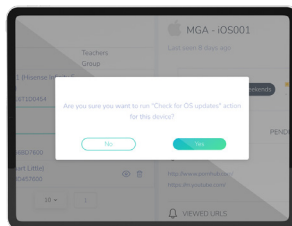

Mobile Guardian supports

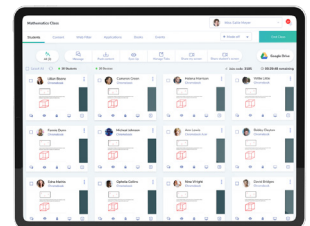

Save Your School Some Time

Remote Passcode Clearance
Remotely clear the passcode from the iOS device without ever needing to leave your desk.

Automated iOS & App Updates
Automated updates save you time when it comes to managing a fleet of iOS devices.

Student Linking / Mobile Authentication
Operating a Shared Device strategy? Students can collect a device and quickly login using Active Directory or their G Suite account.

## Official software vendor for Singapore's schools

Fully Integrated for Seamless Management

The Mobile Guardian MDM platform is fully integrated with Apple School Manager,
the Volume Purchase Program (VPP) and the Device Enrolment Program (DEP).

ASM / Classroom

Apple School Manager is a web-based portal that enables I.T. administrators to easily deploy iOS devices in schools.

Volume Purchase Program (VPP)

The Volume Purchase Program allows schools to purchase volumes of apps and books to distribute amongst students and teachers.

Device Enrolment Program (DEP)

This online service automates the enrolment and configuration of macOS and iOS devices.

Make Managing iPads Easier

Push Content Remotely

Send content like Youtube links, PDFs and web clips to your iOS devices, straight from the Mobile Guardian dashboard.

Safe Web Filtering

Manage web access on iOS devices with our safe browser and webkit plugin. Ensure every device upholds your eSafety policy.

Restrict Store Content

Enforce age restrictions to ensure that all store content is always age-appropriate.

Managed App Deployment

Deploy apps across your iOS devices and know that each device has exactly what it needs.

Self-help App Portal

The self-help portal that allows I.T. managers to efficiently manage and coordinate a large volume of apps throughout the school year.

Location Tracking & Lost Mode

You'll be able to track location and remotely trigger lost mode on the device. Increase your chance of recovering stolen iOS devices.

Inventory Management

Monitor the health of your iOS devices and swiftly identify those that need updates or haven't been seen in a while.
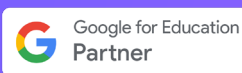

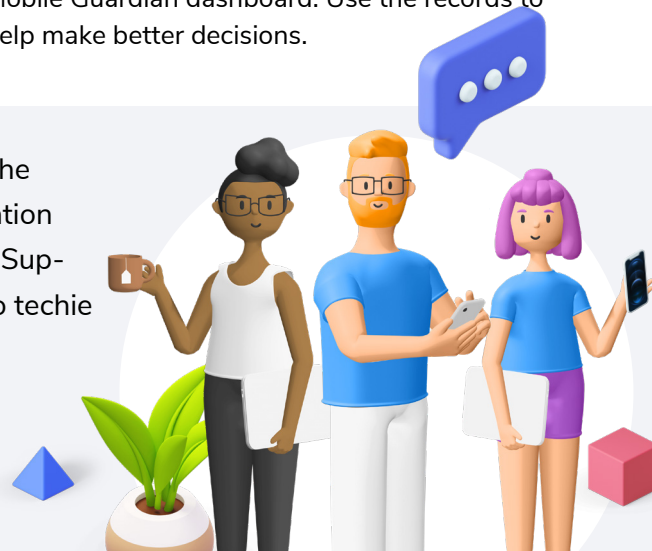

Student Browser History

View the browser history of each device via the Mobile Guardian dashboard. Use the records to help make better decisions.

"Mobile Guardian works seamlessly throughout our organisation. The control and rollout of apps to our iPads is easy to manage. The location feature has been a lifesaver when tracking down a missing device. Support is always helpful and they explain things in a way that isn't too techie but understandable."
