

Mobile Guardian for Windows

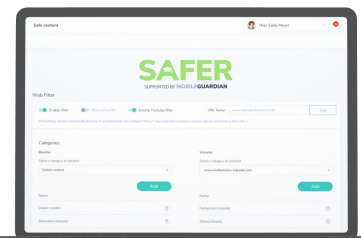

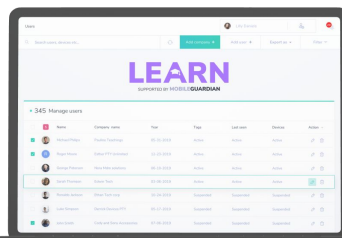

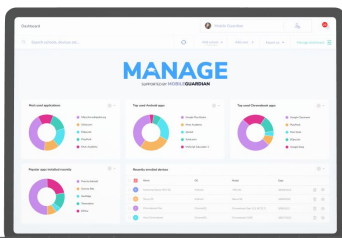

Mobile Guardian makes it easy to manage all your Windows devices from a single dashboard. The multi-OS solution offers powerful Mobile Device Management, Classroom Management Tools and comprehensive Web-Filtering for digital classrooms.

Mobile Guardian Supports

Campus

A Complete Solution

Mobile Device Management

Enrol devices and users, reset devices and passwords with our remote device management software.

Classroom Management Tools

Easily manage and structure lessons, eliminate distractions and unlock the learning potential of your Windows devices.

Web Filtering

A vital, online protection layer for K-12 schools. A dynamic and comprehensive, CIPA-compliant filter that protects students online.

Official Device Management Application for Singapore's schools

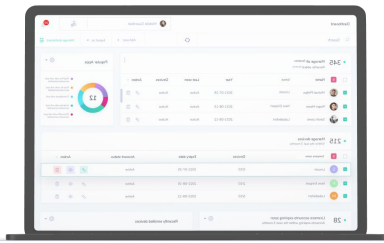

Ministry of Education
SINGAPORE

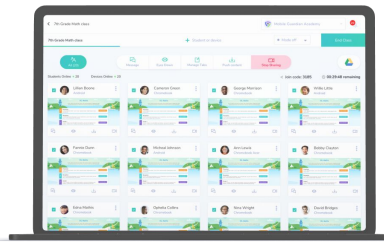

Fully Integrated Windows Device Management

Mobile Guardian integrates with Microsoft InTune to easily integrate with your device management processes to save time when migrating and enrolling devices.

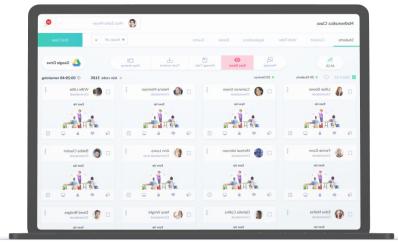

District Dashboard

The District Dashboard is designed for at-scale device management of hundreds of schools.

Live Screen Views

Teachers gain a clear view of student device screens in real-time from their classroom dashboard.

Eyes Up

Quickly, Easily, and Instantly lock student device screens to ensure focused instruction with one click.

Manage Windows Devices With Ease

Remotely Push Content

From your dashboard, push content like URLs, Youtube links and class content to all your Windows devices.

Microsoft Intune Integration

Integrate Microsoft InTune with Mobile Guardian for an effortless migration and enrolment process.

Shared Device & Student Linking

Easily manage shared device programs by linking multiple students to individual devices for unique user controls.

Location Tracking

Track devices and locate missing devices, lockdown stolen devices, reset passwords and track its location.

Managed Application Deployment

Through Mobile Guardian and Windows InTune, applications and programs may be deployed to student devices with ease.

Screen Share

Teachers may present a concept to the class through screen share for clear communication and presentation.

Safe Web Filtering

Create safe and secure online learning environments with a cloud-based web filter. Ensure student safety wherever and whenever they connect to the internet.

Device Usage Reports

Understand Student Device usage history with web filter reports, application usage reports and changes to settings reports.

Time & Location Restrictions

Set device usage restrictions relative to device location and the time of day, to ensure flexible and fluid device management processes.

Microsoft OneDrive Integration

Easily distribute class content to students via OneDrive for quick and easy sharing of Word, Excel and PowerPoint files with students.

Coming soon

"With Mobile Guardian, teachers are no longer teaching unidirectionally, but are empowering students to learn."
