Cañon City Schools Challenge:

Cañon City Schools implemented a 1:1 Chromebook program for all K-12 students, with the desire to give students a greater opportunity to connect with the greater world through access to the internet while allowing Teachers to monitor student screens and easily implement a web filter.

The Solution:

Cañon City Schools deployed Mobile Guardian’s Campus solution across the entire district. Our teachers can now utilize Mobile Guardian to control devices during class, monitor student device screens, implement a web filter, as well as to pass information to all student devices.

Mobile Guardian helped us effectively support learning from a distance.

Like many other schools, we were forced to implement Distance Learning due to COVID-19. Our teachers were very thankful for Mobile Guardian's Classroom Management feature. It allowed them to effectively support students with distance learning.

Teachers are able to monitor students' behaviour online.

Teachers requested a way to monitor student screens during class to help students stay on task. We were also looking for a system that would allow us to easily implement a web filter for the devices going home with students.

The support provided made our initial setup quick and painless!

The initial setup is pretty intensive, but Mobile Guardian provides support all along the way to make the process quick and painless.

Our Report Card

“The customer service has been fantastic. Whenever we have had questions or concerns, we have received prompt and personalized support. It has been a very beneficial relationship.”
