Katariba Kikkake Program Challenge:

Katariba Online is a non-profit organisation working with leading academics in Japan to understand how technology can be used to help children learn more effectively and fully develop their potential. To facilitate our research, we were on the lookout for a solution that could provide us with detailed anonymised usage data. We looked at a number of solutions but we found very few that could do what Mobile Guardian is able to do.

The Solution:

Mobile Guardian was able to provide us with a feature that helped us understand more of how students were using technology. Mobile Guardian also has a very nice and intuitive user interface that provide clear points of comparison between application usage.

Mobile Guardian is ideal for our multi-purpose environment

At Katariba we are using Chromebooks to provide children with a web-based platform to learn and connect using a wide range of educational content as well as an online mentoring programme which offers 1-on-1 and group mentoring. Mobile Guardian provided us with the tools we were looking for in order to carry out our research.

We would highly recommend Mobile Guardian to any Education Professionals.

Overall, we were very impressed with Mobile Guardian. We were especially drawn to Mobile Guardian's solutions which allows us to select the features we need rather than a lot of functionality that we do not need, and their support for multiple platforms.

Our Report Card

“Mobile Guardian is the best solution, especially for a multi-platform environment.”
