King's School Program Challenge:

We had a different MDM vendor in place, but were unhappy with the level of support we were receiving from them. We were on the look out for an MDM solution that would enable us to manage an entire suite of iPads on one platform, allow for content management for our modern language courses and track devices. Most importantly, we were looking for better levels of customer support.

The Solution:

Mobile Guardian are able to provide us with features that help us understand more of how students are using technology and they also has a very nice and intuitive user interface that provides clear points of comparison between application usage.

Ease of Migration

Mobile Guardian's Support was very impressive!

We were very impressed by Mobile Guardian's support. The initial setup was quick and without hiccups. We went from their web demonstration, straight to trial and then made the purchase once the testing period was done.

Device Management has never been simpler.

Overall, we were very impressed with Mobile Guardian. Once installed, one of the immediate benefits was the simplification of managing devices within our school. Secondly, the support provided by Mobile Guardian was significantly better than our previous MDM provider.

Our Report Card

“ The Mobile Guardian setup process was very quick and without hiccups.. ”
